

# Boiling Billy

## Remote Controlled Underbench Boiler Safety Package Option

- Remote controlled solenoid cut-off valve stops flow of boiling water to the sinktop dispenser tap.
- This safety package has a built in timer which automatically disables the flow of Boiling water to the Dispenser Tap after 10 minutes of activation.
- This remote control can be carried (or put in a safe place) by the person in charge

**Particularly useful for use in  
Schools, Hospitals, Elderly Person's Homes,  
Private Residences and anywhere where safety is an issue.**
